<p>RELEASE OF LIABILITY / ASSUMPTION OF RISK: As you are aware, there are obvious risks in most active rescue training courses. During training, emergency situations that arise as a result of site conditions or application of instructional techniques cannot always be anticipated. We make every attempt to reduce this risk and uphold a level of expectation that safety parameters are implemented and maintained at all times. The instruction provided in this weekend's training is intended as a guideline in how to handle a similar situation, but cannot address every response circumstance encountered during an emergency. Participant understands and assumes all risks associated with the training and its use by signing below.</p>
